PROJECTS

- **Python Based Personal Portfolio Website -** Link

This website is made to showcase a detailed view of my personal profile. It's purely python based but have used basic Bootstrap and CSS for styling. Have also embedded a submission form which will directly mail the response to me. Link to the website.
(Technologies :- Python, Streamlit, Bootstrap4, CSS.)

- **AI Based Virtual Assistant with GUI -** Link

This virtual assistant works on Speech Recognition and is capable to follow various commands . It is integrated with an interactive GUI which enables users to change the name or to run the assistant as many times they want with keyboard control.
(Technologies :- Python, Speech Recognition, Tkinter, pysttx3, and many other Python libraries.)

- **Automated Stock Order Placing Application with Telegram Bot -** Link

Built an automated application for placing specific stock orders on Kotak trade platform received from Zerodha trade platform with various constraints and features and integrated it with a Telegram Bot to receive error texts.
(Technologies :- Python, Jugaad Trader API, Kotak Trade API, Pandas, Regex.)
